

AMC launch new **AMC** stereo preamplifier **iMIX 18**

iMIX18 it is the new AMC tool for professional installers. We have worked hard to develop simple, reasonable priced and good quality mixer preamplifier. Six balanced XLR, selectable gain, MIC/LINE inputs, two stereo RCA inputs in parallel to microphone XLR inputs. Phantom power is activated by external DIP switches on each universal XLR input. Priority input on/off selectable with DIP switch on first universal XLR input. Tone, balance and master control. Bi-color LED for signal indication and clip indication. Balanced XLR stereo output, ground lift and stereo/mono selection DIP switch. Ready for stereo mode. iMIX18 with built in preamplifier and mixer will be widely used in paging and background music applications. Please come and see it on our stand **5S86**.

Small size powered cabinet loudspeakers by **AMC** **Power Box 5 and Power Box 5R** (Stand 5S86 at ISE2012)

The pair of **Power Box** loudspeakers consisting of loudspeaker with built-in 2x20W (Power box 5) and 2x15W (Power Box 5R) stereo amplifiers and second non powered loudspeaker ready to connect to active loudspeaker via Phoenix connectors. 5,25" woofer and 1" tweeter produce clear and natural sound which could be used in various applications. It is perfect choice for small installations in a class room, communication and paging systems.

Infrared remote control is included in set of Power Box 5R.
